## Summary

As a Mid-Level Software Developer at aqua IT, I work with a team of talented engineers to design, develop, and deploy innovative web applications for various clients and industries. I use my skills in Java, Python, JavaScript, Angular, Mongoose, and AWS to create user-friendly, secure, and scalable solutions that meet the business and technical requirements.

I am passionate about learning new technologies and best practices, and I constantly seek opportunities to improve my knowledge and performance. I have completed multiple certifications, including CompTIA A+, ITIL Foundation Level, and TS/SCI, and I am currently pursuing a Master of Engineering degree in Computer Science at Virginia Tech. I am also an active member of the AWS community, where I share my insights and experiences with other cloud enthusiasts. My goal is to become a proficient cloud architect and a leader in the software engineering field.
